University of Cincinnati, OH
College of Engineering and Applied Science
Bachelor of Science, Computer Science

July 2024

Work Experience

AMEND Consulting — Cincinnati, OH

July 2025– Present

Senior Technical Analyst

- Led discovery and delivery support for two enterprise modernization initiatives at \$2B+ corporations
- Used data-analysis to drive client on-time delivery from 73% to 97%
- Modernized and improved a legacy application to create a net savings of \$1.5M annually
- Enhanced an existing algorithm using insights from customer behavior and historical consumption data
- Served as lead frontend developer/UI designer for an enterprise app modernization initiative
- Led daily UAT sessions with key users ahead of go-live to instill user confidence in the application
- Utilized Power BI and SQL to centralize KPI reporting and monitor rollout impact
- Led a Kaizen event for 40+ employees to implement new procedures designed through data analysis and operational workflow assessment
- Built solutions in Power Apps, Power Automate, and C# with custom API integrations
- Tracked technical debt, defects, and delivery progress across the project lifecycle
- Coordinated communication between client stakeholders and the internal delivery team
- Maintained technical documentation, final handoff materials, and outcome presentations

Seven Hills Technology Solutions — Sharonville, OH

July 2024 – July 2025

Software Developer

- Backend developed for three .NET web apps with C# and React.js to streamline order and payment workflows
- Engineered systems powering a restaurant chain with 190,000+ monthly customers and 10,000+ weekly orders
- Built a production tracking tool for multiple restaurant locations, improving wait time accuracy by 62%
- Supported the development of a healthcare platform serving 60+ private practices, ensuring HIPAA compliance and secure data handling
- Integrated 7+ third-party APIs, enhancing product capabilities and reducing manual workflows
- Built backend logic and Azure workflows with MySQL to boost efficiency and reliability
- Led client demos and daily standups, ensuring alignment and accelerating delivery cycles

Kroger Technology Digital – Cincinnati, OH

May 2022– May 2023

Mobile and Web Developer Intern

- Generated \$7 million dollars in annual savings through the creation of a new user-facing feature
- Increased online order fulfillment speed by 0.30 seconds
- Supported development of features for Kroger's online order fulfillment Android application used in over 2,000 stores nationwide
- Served as a Feature Lead and developer for the implementation of a new user-facing app page written in Kotlin and XML
- Wrote technical specifications, user stories, and reports to document product lifecycle
- Built automated testing scripts for app hardening and increased product stability
- Operated as a Feature Lead on Kroger's online order fulfillment progressive web app
- Built two user interface features deployed to more than 2,000 Kroger stores
- Conducted A/B testing in beta stores to create data-driven decisions on user-facing app features
- Utilized react.js, HTML/CSS, and agile methodology during development
- Utilized emerging generative AI to develop intelligent virtual assistants to increase user engagement
